Today 152 National Forests are owned by the people of the United States. These forests contain almost one-third of the nation's remaining saw timber. Here, also, are vast storehouses of water from which many towns and cities receive their entire water supply. Here grasslands provide range for cattle and sheep. Here are food and cover for wild animals and birds and streams for fish. Here, too, are recreation areas for generations of Americans. (Available from most Film Libraries.)
